

Eighth Annual Conference – Oct. 2nd, 2016

Presentation Title	Challenges in ERP implementation
Speaker	Maha Nassar
Abstract	<p>Enterprise resource planning (ERP) system play a major role in improving the competitiveness of organizations. ERP can provide significant improvements in efficiency across a company, but only when implemented correctly.</p> <p>However, not all ERP implementations have been successful. Since ERP implementation affects entire organizations such as process, people, and culture, there are a number of challenges that companies may encounter in implementing ERP systems.</p> <p>With a brief overview of ERP implementations, this session will present some experiences of a SAP implementation in a large corporation specialized in discrete manufacturing. The presentation will focuses on the challenges encountered during the implementation journey.</p> <p>Moreover, Critical Successful Factors (CSFs) and risk factors to implement ERP will be highlighted. Finally, suggestions are offered in resolving the issues of implementing ERP.</p>
